-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This application contains claims directed to the following patentably distinct species:

Species I, wherein the compound is integral with a portion of a package in the form of a packaging material ;

Species II, wherein the compound is added to the package;

Species III, wherein the compound is associated with an apparatus comprising a source of gas for use in a chamber;

Species IV, wherein the compound is directly applied to a consumer product.

In addition, if Species II is elected, a further election is required between:

Species IIa, wherein the compound is associated with an applied strip;

Species IIb, wherein the compound is associated with a loose strip;

Species IIbc, wherein the compound is associated with a sachet;

In addition, if either Species I or II is elected, a further election is required between:

Species I/IIa, wherein the compound is released under normal conditions of temperature and pressure;

Species I/IIb, wherein the compound is released under the external stimulus of heat;

Species I/IIc, wherein the compound is released under the external stimulus of microwave radiation;

Species I/IId, wherein the compound is released under the external stimulus of mechanical energy.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic to all claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).

To expedite prosecution, it is noted that since claim 8 recites that the compound diffuses under normal conditions of temperature and pressure, claims, such as claims 15 and 16, which recite external stimuli to release the compound, would appear to be improper dependent claims, since they do not restrict the claims from which they depend.
